

FOR IMMEDIATE RELEASE

SHOWCASE TECHNOLOGY ACQUIRES THE ASSETS OF KIOSK LOGIX

TORRANCE, CA - (July 14, 2009) - Showcase Technology (formerly Showcase Business Centers), the leader in providing automated Internet, copy, FAX and scan services, recently announced that it has acquired Kiosk Logix, the leading provider of secure kiosk software in the world, NetStop™.

NetStop™ software is the prominent kiosk software system for securing computer systems in an unattended location. It is secure, reliable, easy-to-use, and tamper-proof. The web-based database and remote management tools give administrators complete computer usage and sales statistics. NetStop™ is effectively used in kiosks worldwide by retail, hospitality, educational institutions, hospitals and healthcare providers, credit unions, governments, pharmaceuticals, human resources, entertainment companies, banks and financial institutions. There are currently 23,000 NetStop licenses in over 60 countries around the world.

“The acquisition of Kiosk Logix positions Showcase within the global marketplace and leverages Showcase's suite of proprietary products and services,” said Paul Rajewski, CEO of Showcase Technology. “Showcase will continue to enhance Netstop’s™ capabilities with innovative features in order to meet the future requirements of our new and existing clients.”

Kevin Mathison, CTO of Kiosk Logix, said the acquisition signifies, “Showcase's wealth of experience and resources while insuring that Kiosk Logix continues to flourish through the development of untapped features of Netstop™.”
